

Continuity of Instruction

FOR STUDENTS IN GRADES 9-12

PARTICIPATION

All students are expected to make every reasonable effort to engage with presented learning opportunities. Understandably, students may have occasional conflicts in their schedule, but these interruptions should be kept to a minimum just like a normal school day.

Individual teachers will provide clear expectations for students.

SCHEDULE

- Normal schedule of classes
- **Class engagements are one hour**
- At-home learning is **not to exceed three hours** per subject, per week, inclusive of the scheduled class times
- **Four instructional days (M-TH)**
- Science Lab Classes are only 2/4 days
- Friday is to catch up on the week's assignments and to check in with teachers during their office hours

CONTENT & RESOURCES

- A combination of live teaching, recorded lessons, and teacher-designed learning activities
- Teachers will share assignments directly with students
- **Condensed curriculum to the most essential concepts**
- Special education-related services and ENL instruction will help meet student needs

COMMUNICATION

It is critical that students make every effort to stay connected with their teachers and to communicate issues as they arise.

- Teachers have office hours every day and will communicate their availability to students, which will provide an opportunity for more individualized support
- Outreach to families whose students are not participating regularly to see if they need assistance

GRADING

A simplified, non-traditional model of grading, assessing demonstrated evidence of learning pertaining to essential content, concepts, and skills.

DEL: Student has demonstrated evidence of learning

NEL: Has not demonstrated evidence of learning

NSY: Student has not submitted work yet

College-level and AP classes may be handled differently based on the direction provided by associated institutions and the College Board.

We are dedicated to the success of our students and feel it's important that they continue their academic and social-emotional growth during our extended school closure. Online learning will focus on teaching new content to continue to inspire all students to be active life-long learners, able to achieve their highest potential in a demanding and ever-changing global community.
