

NYS School Funding Transparency Submission

Background

Chapter 59 of the Laws of 2018 requires school districts to “annually submit to the Commissioner of the State Education Department (SED) and the Director of the Budget..... a detailed statement of the total funding allocation for each school in the district for the upcoming school budget year” in a “form developed by the Director of the Budget in consultation with the Commissioner.” According to the Division of Budget, the form seeks to capture school districts’ methodologies and/or rationales for school-level funding determinations, including funding from State, local and federal sources. The form also surveys school districts’ projected centralized district costs, school-level student and staff information, and school allocations for various programs.

Reporting by all 673 school districts is phased in as follows by budget year:

- 2018-2019 Budget: 76 districts as defined by (a) four or more schools as reported in SED’s 2016-17 School Report Card database which receive more than 50 percent of their total revenue from State Aid as reported in SED’s 2015-16 Fiscal Profiles Masterfile or (b) located in a city with a population of more than one million
- 2019-2020 Budget: 306 districts as defined by four or more schools as reported in SED’s 2016-17 School Report Card database (this includes East Greenbush Central-School District)
- 2020-2021 Budget: The remaining 291 districts will report

Submission of the form is required this year by August 30.

The reporting is separate and apart from required documents submitted under the Every Student Succeeds Act. All allocable actual expenses to buildings from the 2018-2019 year will be sent to SED in early 2020, with final reports published as part of the School Report Card.

Education Law §3614 School Funding Allocation Report

Part F - Narrative Description

1. (A) Describe the local methodology/approach used to allocate funds to each school in the district during the process of budget development and implementation. (B) Please also describe the role(s) of all relevant stakeholders in such budgetary processes and decision-making. (C) Finally, if schools are allocated a significant portion of their funds—either in part or in full—through a formula, outline the nature/mechanics of the formula and the elements impacting each school's allocation.

Specifically, the Division of Budget and the State Education Department would consider a complete response to this question to include explicit answers to the questions included in the rubric below, including a substantive discussion on the translation of students needs into the district's budget (at least 1 sentence per question, when applicable).

The District has a zero-based budgeting process that begins in October with building principals and administrators meeting with district officials to review staffing and resource needs to best serve its students. Factors such as student enrollment, special education needs, English Language learner needs, and other student support services are considered when building a budget for each building. Maintenance and transportation must also weigh its staff and material needs to best support the district's education objectives. The District office also takes into account benefits, debt service, legal, and other administrative costs that are part of the budget.

2. If applicable, is there anything unique about certain schools which explain why per pupil spending at these locations may be significantly higher/lower than the district average?
3. If applicable, describe any items which the district feels are anomalous in nature and require additional description.
